All Garant catalogues and technical brochures - PDF ... Here the first 1 pages from the catalogue "Extra long centre drill"

List of screw drives - Wikipedia

A screw drive is a system used to turn a screw. At a minimum, it is a set of shaped cavities and protrusions on the screw head that allows torque to be applied to it. Usually, it also involves a mating tool, such as a screwdriver, that is used to turn it. The following heads are categorized based on commonality, with some of the less-common drives being classified as "tamper-resistant".
